

ALABAMA CTE CAREER READINESS INDICATORS

Effective 8/1/24, Revised 7/18/24

Career Readiness Indicators (CRI) Overview

Career Readiness Indicators (CRIs) are credentials or certifications available to students enrolled in programs where technical skills align with industry standards. While CRIs may not be available for all programs, they serve as proof that a student possesses the necessary skills for entry-level employment. It is essential to include CRIs in each student's information file.

Testing and Assessments

Testing for CRIs is at the discretion of the LEA Career and Technical Director, based on student readiness. Pre-assessments are required to ensure that students are adequately prepared for certification exams. The Career and Technical Director must ensure each program has a structured method to determine student readiness, which should be driven by program data, classroom performance, and skill acquisition within the student's pathway.

Alignment and Attainment

CRIs are listed in the grid by Cluster and Program alignment. College and Career Readiness status is granted for the CRIs listed for each program. Programs must be declared by the LEA, the school, and the student. CRIs may be offered to any career and technical education student enrolled and declared in a program with sequenced courses that align with a local, state, or national third-party credentialing agency. Only the credentials on this list can be used to meet the College and Career Readiness requirements of the Alabama High School Diploma regarding post-secondary credentials.

Roles and Responsibilities

The Program Teacher, Career and Technical Director, and local program Advisory Committee should:

- Review the Alabama State Department of Education (ALSDE) Career Readiness Indicators list to identify appropriate third-party credentials or licenses for their program.
- Select CRI credentials best suited for the program, students, and local industry needs.
- Recommend alternative third-party CRIs for approval if local labor market demands justify the need for an alternative credential.

New CRI Procedure

Recommendations for new CRIs must be submitted by the due date each year by the local Career and Technical Director utilizing the CRI Submission Process through the Alabama State Department of Education. CRIs will be reviewed through the CRI Committee Procedure. The CRI list is updated each academic year. Always check the revision date of this document to be sure it is the most current list. Highlighted credentials are new this year.
