

Assembly Procedures

Directions:

1. Using the information gathered from the presentation, you will demonstrate the correct procedure for assembling a small engine.
2. Depending on your school's resources, this may be done with a Kohler® Command Pro CH 270 as presented in the segments or another engine your school will provide.
3. Be sure you follow all steps and perform all work adequately.
4. Always follow the service manual for the engine provided and directions provided by your instructor.
5. Your instructor will provide more details concerning requirements and expectations of the *Activity* prior to beginning the disassembly process.
