

EMT Role Play

Directions:

Using the information provided in the *First Aid Basics* presentation, participate in the *EMT Role Play Activity* to demonstrate you understand of how perform each task during each situation.

1. Find a partner. Each of you will be assigned a common injury discussed in class.
2. Decide, with your partner, who will role play as the victim first and who will role play as the EMT first. The victim will pretend to have the injury. The EMT will assess the injury, treat the injury (e.g. clean the wound, bandage the wound), and provide the patient with advice about how to care for the injury long-term.
3. Switch roles and repeat step two.
4. When finished, each partner will complete the table below, addressing the procedures you demonstrated during your role play.

<u>Injury</u>	<u>How to Assess</u>	<u>How to Treat</u>	<u>Long-Term Treatment</u>
