

Welding Practice

Directions:

During this presentation you will be using the shop to practice your oxy-fuel welding techniques. Remember to take all safety precautions to ensure a safe working environment.

Class 2

1. Gather all necessary materials.
2. Run through all steps of oxy-fuel welding from set-up to shut down.
3. Repeat without actually welding anything until you have mastered every step.
4. Safely clean up all materials.

Class 3

1. Gather all necessary materials.
2. Practice changing to a welding tip.
3. Practice changing to a heating tip.
4. Practice cleaning both a welding and heating tip.
5. Safely clean up all materials.

Class 4

1. Finish practicing all welds not completed.
2. Safely clean up all materials.
