

# Civil Court Cases

## *Directions:*

1. Your instructor will divide the class into groups of two. Each group should research civil court cases and choose one case. Notify your instructor of your choice to ensure no two groups choose the same case.
2. Using the Internet, library or any other available resources, further research your case. Be sure to include the following information:
  - Who was involved (plaintiff vs. defendant)
  - What caused the case
  - What was the offense
  - What civil procedure was used in the case
  - Any complications in the case
  - What decision was made
3. Using your research, create a Microsoft® PowerPoint® presentation consisting of at least ten content slides discussing the case. You should also include at least two additional slides for the title and reference slides.
4. Share your presentation with the class and be prepared to answer questions.
