

Personal Protective Equipment

Directions:

You are starting your own independent small business, contracting welding jobs and must purchase all of the materials and equipment to start the business.

1. For this project you are only calculating the cost of the personal protective equipment required.
2. All items listed below must be purchased before you can open your business. How much you decide to spend on each item is up to you.
3. Describe each item in detail, where the item will be purchased, how much it will cost and any associated accessories for the item including warranties.
