Technology Timeline

Directions:

1. Your group will be assigned a 10-year time span beginning with 1900.

2. Using the Internet, library or other resources, research different technological advances during the assigned period of time

3. After research has been completed, create a Microsoft® PowerPoint® presentation detailing the findings.

4. Images or videos can be included if it can help explain the technology.

5. The presentation must cover the entire time span and include at least eight different technological advances.

6. You have the opportunity to earn extra credit by including influential people or historical events which had an impact during the time period.
