

Understanding Auto Insurance

Directions:

1. Working with a group, research the following:
 - types of auto insurance (including liability, collision, comprehensive, personal injury and uninsured/underinsured motorist), what each type covers and reasons one may purchase or not purchase each type
 - at least four auto insurance companies and the ratings and reviews for each
 - estimated costs of at least four auto insurance packages based on quotes provided for your situation
2. Use the information you collected to create an informational Microsoft® PowerPoint® presentation. Use graphics, photos and design elements to make the presentation visually appealing. List all sources of information on a final bibliography slide. The presentation should be at least 18 slides long excluding title and source slides.
